

SERVICE BULLETIN

Date: 5/22/07

Number: SB0207

Subject: Un-Crating Fuzion units.

Details: When un-crating the Fuzions and driving them off the pallet you must add a 2 boards to the pallet (Refer to drawing as to location.) This will prevent the drive wheels from dropping down and damaging the brake link on the transaxle. Please make all Service/Set-up personel aware of this set up procedure as Encore **will not** consider this warranty if damage occurs while unloading the unit from the pallet.
