Subject: Blade Spacers for Maintenance Free Spindles

Details:

All Encore Premier Series mowers from serial # 33333 and above are now equipped with a new spacer bracket, spacers, and a 5/8"x1 1/2" HHCS. Blade heights are still adjusted in 1/4" increments by adding or removing spacers to achieve the desired height. Units are shipped with three spacers on each spindle using a 5/8"x2 1/4" HHCS. The maximum number of spacers to be used with this HHCS is five. If an application requires two spacers or less, please use the 5/8" x 1 1/2" HHCS supplied on the bracket.
