

X-treme Hydro Line Routing

Details: Rotate hydro pump lines to a 6 o'clock position. By rotating the lines to a 6 o'clock position, it will help prevent lines from being interfered with by the deck. When performing this adjustment, the wheelmotor fittings may have to be rotated to a 3 o'clock position so as to accommodate the repositioning of the hydro lines.

Part # 533113 @ 6 O'clock positions
