

Z34 Tracking Adjustment Kit

(part # 342075)

- 1) Remove bolts from two bolt bearing located on LH and RH side of the machine beneath fender.
- 2) Replace bolts with 5/16x1 3/4 HHCS provided in kit. Slide 5/16 flat washer onto bolt first and place bolt back into seat frame and bearing.
- 3) Place spacer onto bolt and tighten into place with 5/16 whizlock nut while holding bearing up slightly to keep it centered.
- 4) After locking spacers into place, slide the control stop onto bolts and secure with 5/16 whizlock nuts.
- 5) Tracking is now ready to be adjusted by rotating control stop forwards or backwards as needed.

Parts List

Qty	Part #	Description
2	343138	Control Stop
4	363113	Spacer
4	100276	5/16-18x1 3/4 HHCS
